CONTENTS OF VOLUME 6

NUMBER 1

P. H. G. Allen O. Szpiro E. Campero	Thermal Analysis of Power Transformer Windings	1
M. Rafian	Transient Analysis of Capacitor Motors Using Dynamic Phase Coordinates Theory	13
Y. Baudon A. El Zawawi M. Ivanes	Homopolar Linear Synchronous Motor: Steady State Analysis and Experimental Results	23
F. C. Trutt	Equivalent Circuit Analysis of Shaded-Pole Motors	35
I. Boldea	Static and Dynamic Performance of Electrodynamic (Repulsion) Levitation Systems (EDS)	45
I. Boldea	Optimal Design of Attraction Levitation Magnets Including the End Effect	57
S. Williamson P. Breese	Twice-Line-Frequency Pulsating Torques in Shaded-Pole Motors	67
J. J. Cathey S. A. Nasar	Design Aspects of Endturn Bands and Coil Supports with Reference to Commutation of DC Machines	79

NUMBER 2

J.-J. Simond	Laminated Salient-Pole Machines: Numerical Calculation of the Rotor Impedances, Starting Characteristics, and Damper-Bar Current Distribution	95
Richard A. Marshall William F. Weldon	Parameter Selection for Homopolar Generators Used as Pulsed Energy Stores	109

A. El Zawawi, Y. Baudon, M. Ivanes — Dynamic Analysis of an Electromagnetically Levitated Vehicle Using Linear Synchronous Motors 129

L. Boyer — Small Perturbation and Transient Behavior of a Superconducting Three Element Synchronous A.C. Machine 143

P. S. Srinivasan, C. Velayudhan, P. K. Charlu — A Solid State Resistance Controller for 3-Phase Slip-Ring Induction Motor 153

A. P. Russell, I. E. D. Pickup — A General Theory of the Parametric Reluctance Motor 157

R. N. Bandopadhaya, V. S. Subba Rao, G. S. Raju — Mathematical Models of Synchronous Machine with Unequal Mutual Reactances 171

Bhga Guru — Correspondence: Discussion on "Design of Auxiliary Phase Windings for Single-Phase Capacitor Fractional-Horsepower Induction Motors" 185

NUMBER 3

E. R. Laithwaite, Stephen B. Kuznetsov — Development of a Stator-controlled Brushless Induction Machine with Leading VAR Capability 189

M. H. Nagrial, Syed Javed Ashraf — B/H Curve Approximation for Computer Aided Designs of Electromagnetic Devices 207

Hayatoshi Yamada — Flux Distribution and Reactance in Enclosed Slot Solid Rotor Induction Motor 215

J. F. Lindsay, K. Venkatesan — An Electromechanical Network Model for Frequency Controlled Induction Motors 225

D. R. Kohli, Shams U. Ahmad, Ali Athar Khan — A New Approach to Performance Analysis of Chopper Controlled D.C. Motor Drive 239

V. Arcidiacono, G. B. Denegri, G. Macció — Identification of Turbogenerator Models from Frequency Response Tests 253

C. Chellamuthu, V. V. Sastry — Simulation of a 1-Phase Static Converter-D.C. Motor Drive System 263

M. H. Nagrial — Correspondence: Hybrid Linear Reluctance Motor 281

NUMBER 4

J. P. Chassande, A. A. Abdel-Razek, M. Poloujadoff, A. Laumond — Comparison of Methods for the Calculation of Line-to-Line Short Circuit of Synchronous Machines at Low Frequencies 287

E. Richter, M. V. K. Chari, S. C. Tandon — Studies of Magnetic Fields in Electrical Machines by Means of Finite Element Analysis 297

J. J. Cathey, S. A. Nasar — Equivalent Circuit of Transfer Field Machine for Asynchronous Mode of Operation 307

M. R. Bailey, J. R. Bumby, B. I. Hassall, A. F. Anderson — Magnetic Fields and Inductances of Helical Windings with 120° Phasebands 323

B. de Fornel, M. Pietrzak-David, J. C. Hapiot — Study and Realization of Numerical Current Regulation of an Asynchronous Machine 337

K. E. Schnirel — Current and Torque Stresses in Synchronous Machines Due to Sequential Out-of-Phase Synchronizing 349

J. Nuta, C. A. Bleijs, C. Glaize, R. Goyet — Tests of an Axial Air-Gap Variable Reluctance Motor Supplied by a Solid-State Converter 361

M. H. Nagrial — Correspondence: Discussion of "Generalized Analysis and Performance of Reluctance Motors" 375

NUMBER 5

B. T. Ooi, P. Brissoneau, L. Brugel — Optimal Winding Design of a Permanent Magnet Motor for Self-Controlled Inverter Operation 381

P. Bhakta — Optimal Regulators for Solid Rotor D.W.R. Synchronous Generator by Output Feedback 391

P. K. Saxena, G. K. Dubey — Comparative Study of Two Quadrant Choppers 407

Hayatoshi Yamada — Surface Loss Reduction in Grooved Solid Poles 423

R. Venkataraman
B. Ramaswami
Thyristor Converter-fed Synchronous Motor Drive 433

C. Chellamuthu
V. V. Sastry
Simulation of Chopper Fed D.C. Motor Drive System—Problem Oriented Approach 451

Book Review 467

NUMBER 6

B. de Fornel
J. C. Hapiot
Ch. Saubion
Commutation Control during Speed Reversal of a Current-fed Asynchronous Machine 469

S. S. Murthy
Bhim Singh
A. K. Tandon
Dynamic Models for the Transient Analysis of Induction Machines with Asymmetrical Winding Connections 479

A. L. Mohamadein
S. A. Hassan
A. M. F. Osheiba
Cageless Reluctance Motor: A New Improvement in Design 493

G. Martinelli
A. Morini
Two-dimensional Winding Models for the Calculation of Magnetic Fields in Superconducting Turbo-generators 511

Nady Boules
Impact of Slot Harmonics on Losses of High-speed Permanent Magnet Machines with a Magnet Retaining Ring 527

D. R. Kohli
Shams U. Ahmad
Performance Analysis of a D. C. Drive Electromechanical System with Elastic Coupling and Pulsating Load Torque 541

Yamada, H., 215, 423

Zawawi, A. El., 23, 129

SUBJECT INDEX TO VOLUME 6

Asynchronous machine, current regulation of, 337
Asynchronous machine, speed reversal of, 461
Attraction levitation magnet design, 57
Axial airgap reluctance motor, 361

B. H. Curve approximation, 207
Book reviews, 467
Brushless induction machine, 189

Capacitor motors, transient analysis, 13, 185
Choppers, two quadrant, 407
Commutation in dc machines, 79

DC drive, torque pulsation in, 541
DC machines, commutation in, 79
DC motor, chopper driven, 239
DC motor, converter driven, 263
DWR synchronous generator, 391

Finite element analysis of fields, 297

Homopolar linear motors, 23
Homopolar generators for pulsed power, 109

Induction machine, brushless, 189
Induction machines dynamic models, 479
Induction motors, controller for, 153
Induction motor, frequency controlled, 225
Induction motor models, 225, 479

Levitation, electrodynamic, 45, 57, 129
Linear motors, homopolar, 23
Linear motor, hybrid reluctance, 281
Linear motors, levitated, 45, 57, 129

Magnetic fields in electric machines, 307, 323, 511
Motors, capacitor, 13
Motor, permanent magnet, 381
Motors, shaded - pole, 35, 67

Permanent magnet machines, 381, 527
Permanent magnet motor, winding design, 381

Reluctance motor, axial airgap, 361
Reluctance motor, cageless, 493
Reluctance motor, parametric, 157
Reluctance motors, generalized analysis of, 375
Repulsion levitation system, 45

Salient pole synchronous machines, 95
Shaded-pole motors, equivalent circuit, 35
Shaded-pole motors, pulsating torques in, 67
Solid poles, surface loss reduction in, 423
Solid-rotor induction motor, slot reactance, 215
Superconducting machines, 143, 323, 511
Synchronous machines, line-to-line short-circuit of, 287
Synchronous machine, mathematical model of, 171, 253
Synchronous machines, salient pole, 95
Synchronous machines, stresses in, 349
Synchronous motor, converter fed, 451

Transfer-field machine, asynchronous operation, 323
Transformer, thermal analysis, 1
Turboginerator, model for, 253
